

Dissemination Activity Report

General information			
Name:	Iwater-International Integrated Water Cycle Show & SmartCity Congress Barcelona		
Type of activity:	<i>Show</i>		
Place:	Barcelona (Spain)		
Start date:	<i>15-11-2016</i>	End date:	<i>17-11-2016</i>
Description of the activity/event			
<p>Iwater is intended as an international meeting point for all the stakeholders who will define the evolution of the water sector, offering innovative high-tech solutions that effectively address challenges such as the efficient management of resources and infrastructures, the increase in water demand in a context of hydric stress, and new models of public-private collaboration.</p> <p>At the event, SOCAMEX (Erik Aagesen) presented EnergyWater project at Inno-Hub. The presentation described the objectives and expected results, description of EMSA webtool and inviting participants to perform the evaluation of their companies.</p> <p>Furthermore, during the three days event there were available at 2 different stands (at iwater and Smartcity Congress) the brochures of EnergyWater project. One of them also show a poster with R&D activities at SOCAMEX with EnergyWater project description.</p>			
Target Audience			
<p><i>Hi profile of participants related to: Water utilities, water professionals, stakeholders, water industries, suppliers, scientific community.</i></p>			
Results and Impact of the dissemination activity			
<p><i>The presentation of EnergyWater project at Inno-Hub together with the brochures shown at two different stands gives a positive vision on the results where we see interest from participants at the event.</i></p>
