

Become a member of a **network of energy efficiency experts** aiming to remove barriers in the **implementation of energy efficiency measures** across European **manufacturing industries**.

energy angel  
network

**Services** offered within the framework of the Energy Angels network:

-  1. EMSA tool support.
-  2. Energy audits and consultancy.
-  3. Implementation and innovation support.
-  4. Provider of financial advice.

The EMSA web tool is an Energy Management Self-Assessment methodology that allows any industrial company to input data and receive an initial energy efficiency evaluation. This evaluation will be based on quantitative and qualitative data about their water processes. Results obtained include:

-  Initial energy efficiency assessment.
-  Benchmarking and ranking position between industrial companies by sector, size, country, etc.
-  List of improvement actions.
-  List of related Energy Angels with required knowledge.

# TRAINING

**Specific training** for the use and understanding of the EMSA web-tool will be organised in Madrid, Paris, Birmingham, Vicenza, Brussels, Cyprus and Poland.

## Who can be an Energy Angel?

Any organisation or individual working with energy efficiency and providing one of the aforementioned services could be part of the Energy Angels network.

Some of our members profiles are:

- ✓ Professionals working in the manufacturing sector.
- ✓ Technology providers.
- ✓ Consultants (freelancers or companies).
- ✓ Energy services providers and ESCOs.
- ✓ Professional associations.

## Advantages of being part of the network

1. Access to an innovative web-tool that will increase industrial energy efficiency in water processes across European countries.
2. Become part of an European wide data base that is freely available to industry.
3. Build long-term commercial relationships by being automatically recommended to companies using the EMSA tool. Your work will be scored and validated, ensuring equal opportunities for all EAs.
4. Improved exposure to industry. It is expected that up to 1.000 companies will use the EMSA tool by February 2019.
5. No participation costs
